Stay Connected Everywhere

Pocket Wi-Fi Rental in Morocco

Experience unlimited, high-speed internet connectivity throughout Morocco with Rent A Phone. Simple, fast, and secure—your gateway to seamless travel.

The Challenge of Staying Connected Abroad

The Problem

Expensive Roaming Charges

International roaming rates can be prohibitively expensive, draining your travel budget.

Unreliable Public Wi-Fi

Hotel and café Wi-Fi networks are often slow, unstable, or insecure for sensitive transactions.

Local SIM Card Hassles

Purchasing and activating local SIM cards requires time, paperwork, and compatibility concerns.

The Solution

Affordable & Transparent Pricing

Simple daily rates starting at 4.9€, with no hidden fees or surprise charges.

Fast & Reliable Connection

High-speed 300 Mbps connectivity available throughout Morocco, from cities to remote areas.

Simple, Ready-to-Use Service

No configuration needed. Receive your pocket Wi-Fi device and stay connected immediately upon arrival.

Unmatched Connectivity: Core Features

High-Speed Performance

Enjoy **300 Mbps** connectivity throughout Morocco, from bustling cities to remote desert locations.

Multi-Device Sharing

Connect up to **10 devices** simultaneously—phones, tablets, laptops, and more.

Extended Battery Life

Stay connected for **8 hours** of continuous use without needing to recharge.

Zero Configuration

No setup required. Receive your device and start using it **immediately**—ready to go out of the box.

Transparent Pricing with Exceptional Value

1

Daily Rental Rate

4.9 € per day (discounted from 9.5€) for unlimited, high-speed internet connectivity throughout Morocco.

2

Deposit System

A **50€ deposit** is simply blocked (not debited) at the time of rental. It is automatically released upon safe return of the device.

3

Exceptional Value

Much more affordable than international roaming charges or purchasing an eSIM. No hidden fees or surprise charges—complete transparency.

Optional Accessories

Portable Powerbank

1.90€ TTC / day

Car Phone Holder

0.90€ TTC / day

Pro Tip: Enhance your experience with optional accessories. Quantities are limited to the number of routers rented, so add them during booking.

Eco-Friendly Connectivity: Commitment to Sustainability

Marrakech, host city of COP 22, symbolizes the global commitment to combat climate change. By choosing Rent A Phone's pocket Wi-Fi rental service, you align with sustainable practices and environmental responsibility.

No Disposable SIM Cards

We eliminate plastic waste by rejecting single-use SIM cards.

Impact: Reduces plastic pollution and promotes durable, reusable connectivity solutions for travelers.

Electric Vehicle Deliveries

All deliveries in Marrakech are made using electric vehicles.

Impact: Significantly reduces carbon emissions and air pollution, contributing to cleaner urban air quality.

Recyclable Packaging

Our packaging materials are sourced from recycled and recyclable materials.

Impact: Minimizes environmental impact through circular economy principles and reduces landfill waste.

Paperless Operations

All contracts and documents are managed electronically.

Impact: Eliminates paper waste, streamlines processes, and promotes eco-responsible digital management.

Seamless Coverage: Connect Anywhere in Morocco

Enjoy stable, fast, and unlimited internet connectivity throughout Morocco, from bustling urban centers to remote desert locations.

Urban Coverage: Reliable connectivity in major cities including Marrakech, Fès, Casablanca, Tangier, and beyond.

Remote Regions: High-speed internet reaches remote mountain areas, small towns, and off-the-beaten-path destinations.

Desert Connectivity: Stay connected even in the Sahara and remote desert regions with consistent performance.

Reliable Performance: Our network infrastructure ensures stable connections from souks to sand dunes without interruption.

- Coverage spans all major tourist destinations and routes throughout Morocco
- Network optimized for both urban infrastructure and rural connectivity
- Seamless handoff between network zones for uninterrupted service
- Tested and verified coverage across diverse Moroccan landscapes
